Business Projection System

RICOH imagine. change.

RICOH PJ X4241N/ PJ WX4241N

Short-throw projection brings you closer to your audience

You want your students to be engaged, to see the big picture and to learn. But first, you have to get their attention — and keep it. With the RICOH® PJ X4241N/PJ WX4241N, you can do it all by projecting brilliant, high-quality images, movies, training videos and more in almost any classroom with nearly any kind of lighting. Because it's designed specifically for short-throw projection, you can place the projector closer to the screen to eliminate shadows, glare, cables and other distractions. When you pair it with an optional interactive kit, you can transform the projector into an interactive whiteboard and add critical information during presentations that students can take with them.

Keep the focus on your presentation

Create more compelling classroom interactions by getting up close and personal. With its short throw capability, the Ricoh PJ X4241N/PJ WX4241N can be placed as close as 23 inches from the screen and can project precise images up to 400 inches diagonally. This means you can stand closer to the screen and clarify specific information in your presentation without casting a distracting shadow or facing the bright glare of the projector's light. Students won't be distracted by a tangle of cables, hot air or noise thanks to forward-facing connections, controls and exhaust. And whether you use the projector on a table's edge or mount it in the ceiling, you can take advantage of its 360-degree projection angle to ensure your projected display is exactly where you want it, and your presentation remains the center of attention.

Collaborate with your audience

You want everybody to learn in your classroom. Shouldn't that include you? Make it easier for your audience to share its ideas with the Ricoh PJ X4241N/ PJ WX4241N. Add the optional interactive kit and transform your projection into an interactive, editable whiteboard where any user can highlight key information using specialized digital pens. With drawing software, it's easy to embed clean, precise shapes or lines around key areas of your presentation to personalize it on the fly for each audience. You can even add discussion notes, or hand a pen to a participant in the room and have them add their own insights for a true interactive experience.

Collaborate with clarity and consistency

Make presenting look easy

Spend more time presenting with the Ricoh PJ X4241N/PJ WX4241N and less time learning how to use it. Your presentation begins moments after you turn it on; when it's done, the device can shut down automatically without residual noise. Use the presentation timer to keep your meeting on schedule. Access all controls on the top of the device or use the convenient remote control to operate it manually without blocking the projection. No need to worry about fiddling for the perfect image. The projector balances itself and uses Keystone Auto Correction to minimize vertical distortion and enhance image quality. Auto Brightness Mode delivers hands-free brightness level adjustments to complement the level of ambient room lighting. You can even adjust the colors of projected images to compensate for the color of the projection surface.

Deliver the right message

It's not enough to simply share your knowledge. You have to share it when your audience needs it — in the format they prefer. The Ricoh PJ X4241N/PJ WX4241N has the same lens technology as a digital SLR camera, so you can showcase sharp, vivid images with up to WXGA (1280 x 800 dpi) resolution. Connect it to DVD or Blu-Ray players using the HDMI port for large-screen movies and training videos, even in MPEG4 or 3D formats. It has a brightness rating of 3,300 lumens and a 13,000:1 contrast ratio, so your audience can see every detail in breathtaking clarity.

Monitor your information to keep your budget in check

Anybody can use the Ricoh PJ X4241N/PJ WX4241N — and it fits almost any budget. Because the projector features Digital Light Processing (DLP), it requires less heat and energy to produce crisp, clear and bright projections. Settings can be controlled remotely via PJLink, so administrators can configure settings, check status and even power the unit on or off remotely to simplify tasks for inexperienced presenters. With Eco Mode, power settings and lamp brightness can be preset to extend lamp life and help reduce operating costs. Use multi-screen mode to show the same presentation with four different projectors in four different locations at the same time.

Ricoh PJ X4241N/PJ WX4241N
